Professional Experience

IT Support Engineer [08/2023 – 03/2024] @ HexQuanta – Rawalpindi

- Managed Azure AD by creating users and groups, configuring access, and implementing RBAC.
- Deployed and configured Windows Server VMs in Azure, setting up VNets, NSGs, and automatic backups.
- Set up Azure Storage accounts, established Blob containers, configured SAS, and implemented replication.
- Established VNet peering for secure communication, configured routing, and applied network security policies.
- Configured Azure Backup for VMs and databases, defined backup schedules, and monitored jobs using Azure Monitor.
- Administered local Windows Server environments, managing DNS, DHCP, AD, and Hyper-V.
- Implemented hybrid cloud solutions, integrating on-premises Windows Server infrastructure with Azure services.

Data Entry Operator [07/2022 – 05/2023] @ EME 505 EBW (PAK ARMY) – Rawalpindi

- Configured standalone servers with a focus on performance and data security, and managed OAS system operations.
- Created presentations for global military visits and prepared compliant professional letters.
- Designed and troubleshooted multi-layer PCBs to military standards, using the Seica Pilot 4D M4 tester for PCB reliability.
- Led as a section supervisor, enhancing team productivity.
- Reverse-engineered the NOD/FAOD night vision sight interface card, saving costs for the Pakistan Army.
- Attended short courses in Radar Technology and PCB Design at NUST and NIE Islamabad.

UI/UX Designer [01/2022 – 04/2022] @Hedge (The Flinch) – Islamabad

Collaborated with developers to design and prototype a fintech KYC tool, using Miro and Asana for project management. Initiated user interfaces for mobile and web platforms, focusing on prototyping to ensure efficient development and user experience.

Content Moderator [08/2020 – 07/2021] @ Bigo Technology – Islamabad

Utilized Bigo management tool for efficient content management. Implemented monitoring, filtering, and auditing procedures for content on Bigo, Imo, and Likee apps to ensure compliance with guidelines and maintain quality and safety standards.
